Thermal Transfer Ribbons

Label Design and Printing Control Software

We are the first among Hungarian dealers of barcode devices who started converting **self-adhesive labels in rolls**. We produce unprinted and color-printed labels according to customer needs in sizes, from paper and special materials with **flexo or digital technology**.

Raw and auxiliary materials of our label production we purchase **directly from the manufacturers**. Our most important suppliers are the well-known for their high-quality raw material in the industry, UPM Raflatac Europe, Avery Dennison Roll Materials Europe Ltd. and the Hungarian BUDAVAL Ltd.

Used by BCL Ltd. – in Hungary the only – with HP Indigo ws4500 roll to roll digital printing machine we print labels with contents required by the customers. From small to medium quantities of labels, using designs obtained from customers, we produce at competitive prices (without printing form cost) with short lead times.

Equipment and components, used by our customers, we purchase from the world's leading barcode label printer manufacturers - **Avery Dennison, Sato, Toshiba TEC and Zebra** We supply . our customers with spare parts, if possible, from the stock.

Our services include service and maintenance of barcode printers, and other bar code technical equipments. Regular participation of our experts organized by the manufacturers trainings is the guarantee of the precise, fast, reliable work.

The **ribbons are used to print labels** we buy from well-known for high quality French Armor SA factory that have different certificates (UL, food contact, etc.). Almost any type of barcode printers we can serve with ribbon.

For barcode printers we distribute **NiceLabel, BarTender label** and **Teklynx** label design and printing control programs.

Due to keeping the production and sales in one hand our prices are competitive and affordable for our business partners.

Our unprinted or printed labels can be found in many industries, including the logistics, the electronic industry, the food and confection industry, a number of representative use them. Almost any type of barcode printer we can serve with ribbon.

Quality, reliability and agility is our strength, recognized by our customers.
